Senior React Developer | Performance and Optimization Expert

I am a results-driven front-end developer with several years of experience specializing in React.js. I have a proven track record of enhancing MVPs and leading large-scale migrations. Whether I am guiding migrations, mentoring developers, or working on greenfield projects, I prioritize delivering clean and maintainable code. My extensive hands-on experience in Agile teams, combined with a keen eye for detail, enables me to quickly adapt to complex technical challenges while improving deployment performance by up to 60%.

Soft Skills

Results-driven, Problem-Solving, Attention to Detail, Analytical Thinking, Technical Mentoring.

Professional Experience

V3 Cybersecurity - Senior Front-End Developer (Remote) 04/2023 – Present

- Joined the company as a front-end developer, responsible for rewriting their Minimum Viable Product (MVP).
- Migrated their MVP to leverage the Ant Design library along with other advanced dependencies, resulting in a 60% increase in performance and a reduction in both deployment and development times.
- Expanded the application by integrating new features and enhancements while adhering to a monthly release schedule.

Tech Stack: React, Vite, CSS, HTML, TypeScript, React Query, fetch, React Router Dom, Ant Design, React Testing Library, Vitest, ESLint, Prettier, MSW, Git, REST API, Agile Methodologies.

Personal Portfolio Project - Senior Front-End Developer 07/2024 – 07/2024

- Developed a fully responsive portfolio website using Astro for static site generation, ensuring fast load times and optimal SEO performance. Integrated Tailwind CSS for efficient and customizable styling, with components designed for both light and dark themes.
- I utilized React to create dynamic components of the site, including the interactive timeline and the light/dark mode toggle. My focus was on optimizing performance and enhancing user experience by minimizing JavaScript usage and implementing lazy loading for assets.
- I deployed the site on Netlify, utilizing continuous integration to ensure seamless updates and rapid deployment.

Tech Stack: Astro, TailwindCSS, React, JavaScript, Netlify, Responsive Design, SEO Optimization.

System One - Senior Front-End Developer (Remote) 07/2022 – 02/2024

- Migrated the Material UI library from an early beta version to the latest stable release, resolving persistent bugs that were caused by the improper implementation of fundamental components.
- Migrated two core application areas, streamlining their logical processes, dependencies, and implementations. As a result, there was a 90% reduction in bugs in the two weeks following the release, ultimately leading to a complete elimination of bugs in those areas.
- Created a separate project utilizing Playwright, Cucumber, and TypeScript to empower the QA team. This initiative enabled the development of automated tests, enhancing quality and preventing regression issues.

Tech Stack: React, Webpack, CSS, HTML, JavaScript, React Query, fetch, Redux, Redux-Thunk, React Router Dom, Material UI, React Testing Library, ESLint, Prettier, Git, REST API, Agile Methodologies.

Austin Software - Senior Front-End Developer (Remote) 12/2021 – 06/2022

- Maintained and developed a platform within the pharmacy industry. Proposed several improvements, tools, and best practices.
- Defined and updated the coding standards for the entire monorepo using ESLint and Prettier. Updated the codebase to ensure compliance with the new standards. Additionally, enabled TypeScript for the frontend application and defined, updated, and created new types to facilitate the upgrade. Trained team members to seamlessly adopt ESLint and Prettier in Visual Studio Code, streamlining their workflow.

Tech Stack: React, CRA, CSS, HTML, TypeScript, Axios, Apollo GraphQL, React Router Dom, Material UI, React Testing Library, ESLint, Prettier, Git, REST API, Agile Methodologies.

J.P. Morgan & Chase - Senior Associate / Technical Lead (Argentina, BA) 02/2021 – 11/2021

- Joined a new team where contributed to the development of a greenfield application. Proposed enhancements to the application architecture, established linting rules, and set coding standards. Additionally, introduced new tools and refactored all tests to optimize their effectiveness.
- As part of my extracurricular activities, I joined a team that evaluates coding exercises to assess candidates and provide feedback to Human Resources during the hiring process. Also, led an Ignite group focused on React, best practices, and related topics. Additionally, served as the technical lead and mentor for an internship program that included six developers, with the objective of creating an application that automates tasks for non-technical teams. This initiative encompassed various stages, including analysis, design, development, testing, and ultimately, production release.

Tech Stack: React, Vite, CSS, HTML, TypeScript, React Query, fetch, Apollo GraphQL, React Router Dom, Material UI, React Testing Library, MSW, ESLint, Prettier, Git, REST API, Agile Methodologies.

J.P. Morgan & Chase - Associate/Technical Lead (Argentina, BA) 04/2020 – 01/2021

- Led a team of three React developers, which was later expanded to six, in migrating from Flex to React. We migrated the code while exploring the features and capabilities of the existing codebase. Whenever possible, we enhanced and updated the workflow to successfully eliminate all deprecated software components within eight months.

Tech Stack: React, CRA, CSS, HTML, JavaScript, Axios, React Query, React Router Dom, Material UI, React Testing Library, ESLint, Prettier, Git, REST API, Agile Methodologies.

J.P. Morgan & Chase - Associate Software Developer (Argentina, BA) 11/2019 – 03/2020

- Joined a team of five front-end developers to design a system for tracking user claims. Improved the development tools, which reduced local build time by 50%. Defined a set of enhancements and best practices, including folder structure, linting, and Prettier rules. Refactored the entire state management architecture, which enhanced overall performance, eliminated duplicate code, and addressed most of the technical debt in the project. Additionally, mentored and assisted junior members and new hires in adapting to the team and company culture.

Tech Stack: React, CRA, CSS, HTML, JavaScript, Axios, Redux, Redux-Thunk, React Router Dom, Material UI, React Testing Library, ESLint, Prettier, Git, REST API, Agile Methodologies.

Globant - Web UI Developer (Argentina, BA) 09/2018 – 10/2019

- Led the creation of an internal product, enhanced its functionality through the addition of new features and code improvements. Actively embraced and promoted team best practices, contributing to the overall efficiency and excellence of the project.
- Served as a resource for J.P. Morgan, where provided valuable support and expertise. Recognizing my contributions and skills, J.P. Morgan extended an offer for a permanent position, a testament to the quality of work and dedication demonstrated during the collaborative period.

Tech Stack: React, CRA, CSS, HTML, JavaScript, Axios, Redux, Material UI, Git, REST API, Agile Methodologies.

Tecnosoftware - Front-End Developer (Argentina, BA) 02/2018 – 08/2018

- Executed a strategic code refactoring initiative, optimizing the current codebase for future migrations to a new stack, showcasing forward-thinking technology solutions.
- Actively participated in the creation of mockups and proposed design enhancements, aligning with established design systems and improving user experience.

Tech Stack: AngularJS, CSS, HTML, JavaScript, Git, REST API, Agile Methodologies.

Bufa Sistemas - Front-End Developer (Argentina, BA) 05/2016 – 02/2018

- Maintained a set of custom jQuery plugins. Collaborated with UX/UI teams to design interfaces and landing pages for a wide range of purposes. Trained new team members in the use of our custom plugins.

Tech Stack: JQuery, AngularJS, JavaScript, HTML5, Sass, Jira, Git, Grunt.

Freelance Project - Django Developer (Remote)	10/2016 – 12/2016
<ul style="list-style-type: none"> Analized, replicated and customized commercial solution for email marketing oriented to car sales. Training users and creating a user manual for future references. 	
Tech Stack: Django, Python, PostgreSQL, HTML, CSS, JQuery.	
Redbee - Web Developer (Argentina, BA)	03/2015 – 04/2016
<ul style="list-style-type: none"> Engaged in development efforts by creating and implementing new API endpoints. Contributed to the expansion and enhancement of the overall system's functionality. Developed front-end components and services, and demonstrated proficiency in full-stack development. This included integration between the front-end and back-end components to ensure a cohesive user experience. Collaborated with cross-functional teams to understand project requirements and translate them into solutions. This involved code reviews and collaborative problem-solving. 	
Tech Stack: JQuery, AngularJS, JavaScript, HTML5, Sass, Jira, Git, Grunt.	
Hewlett-Packard - Ssr. Java Developer (Argentina, BA)	02/2013 – 02/2015
<ul style="list-style-type: none"> Maintenance and new features development for American Airlines marketing platform. 	
Tech Stack: Java, Javascript, JQuery, Spring, Hibernate, MySQL.	
FDV Solutions - Ssr. Java Developer (Argentina, BA)	12/2009 – 01/2013
<ul style="list-style-type: none"> Maintenance and new features development for multiple clients and projects. 	
Tech Stack: Java, Javascript, JQuery, Spring, Hibernate, MySQL.	
GetSense - Ssr. Java Developer (Argentina, BA)	02/2009 – 11/2009
<ul style="list-style-type: none"> Migration of Java Swing application to java web application 	
Tech Stack: Java, Swing, Wicket, Javascript, Hibernate, MySQL.	
Cubika - Java Developer (Argentina, BA)	08/2008 – 01/2009
<ul style="list-style-type: none"> Analysis of technical definitions for middleware. Identify improvements and solutions. 	
Tech Stack: Java, XML, MySQL.	
Teracode - Jr. Java Developer (Argentina, BA)	05/2007 – 07/2008
<ul style="list-style-type: none"> Maintenance and development for multiple clients and projects. 	
Tech Stack: Java, Spring, Wicket, Hibernate, MySQL.	

Education and Training

React - The Complete Guide 2024 (incl.Next.js 4 & Redux)	Udemy 2024
EF SET Certificate (C2 - Proficient)	EF SET 2024
React 16 - The Complete Guide (incl. React Router 4 & Redux)	Udemy 2018
Certificate of Completion, Accelerated ES6 JavaScript Training	Udemy 2018
Certificate of Completion, Introduction to TypeScript	Udemy 2018
Certificate of Completion, Agile Software Development	Kleer 2016
